

Sustainable Power Corp. Publishes Summary of Texas A&M Findings.

BAYTOWN, TX--(MARKET WIRE) – February 1, 2010 -- Sustainable Power Corp. (Other OTC:<u>SSTP.PK</u> - <u>News</u>)) today published, on its website (<u>www.sstp.us</u>), a public summary of the report produced by Texas A&M University scientists on the company's licensed catalytic pyrolysis process to produce Vertroleum® biofuels, biochars, and biogas.

M. Richard Cutler, President and CEO of Sustainable Power advised that "We spent many months and a lot of hard work with the fantastic team from Texas A&M working through the testing and findings, and are now pleased to publish the findings for our shareholders to peruse. The tests confirm what we knew all along...our licensed technology is fantastic and will change how we look at energy for the future. Because we have to protect our confidential technology, we felt we needed a report of the findings which provide comprehensible results, yet does not release sensitive competitive information."

The summary was prepared by SSTP's Technical Advisory Board and newly appointed Chairman of the Board and Chief Technology Officer, Michael Garjian, who stated "The Texas A&M report is unambiguous in its verification of our licensed process. The quantities and quality of output biofuels, biochars, and biogas is extraordinary and this verification paves the way to a new era for SSTP. "

We invite you to view the report at www.sstp.us.

About Sustainable Power Corp

Sustainable Power Corp (SSTP:PK) is a green energy provider focused on environmentally safe biofuels (Vertroleum®), biogases, and biochar. The company has an exclusive license in the United States for a renewable fuel source able to be produced from non-food organic feed stock. <u>www.sstp.us</u>

Safe Harbor Statement

Matters discussed in this press release contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. When used in this press release, the words "anticipate," "believe," "estimate," "may," "intend," "expect" and similar expressions identify such forward-looking statements. Actual results, performance or achievements could differ materially from those contemplated, expressed or implied by the forward-looking statements contained herein. These forward-looking statements are based largely on the expectations of the Company and are subject to a number of risks and uncertainties. These include, but are not limited to, risks and uncertainties associated with: the impact of economic, competitive and other factors affecting the Company and its operations, markets, product, and distributor performance, the impact on the national and local economies resulting from terrorist actions, and U.S. actions subsequently; and other factors available from the Company.
